the ICPSR. All or part of this codebook may be reproduced for
use at member institutions with appropriate citation to the
principal investigators, the ICPSR, and the Central Archive (ZA).

Preliminary Remark

As a result of the increased number and volume of recent surveys connected with the Euro-Barometer survey series, the Inter-university Consortium for Political and Social Research (ICPSR) and the Zentralarchiv für empirische Sozialforschung (ZA) have entered into a co-operative arrangement for the production and distribution of these important data collections. The Euro-Barometer 38.0 codebook was the first product of this joint endeavour. Under this agreement, ICPSR and ZA alternately assume responsibility for the production of each survey. In this way all users will receive Euro-Barometer data sets and codebooks in standard formats although each archive will employ its own study number to identify each survey.

Since this co-operation presupposes common standards for data and codebook preparation, the formatting may in some details diverge from the usual ICPSR or ZA standards. For example, all frequency tables in this codebook are based on unweighted data while ICPSR codebooks generally contain only weighted frequency counts.

Bibliographic Citation

Publications based on ICPSR or ZA data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Reif, Karlheinz and Anna Melich.

Euro-Barometer 38.1: Consumer Protection and Perceptions of Science and Technology, November 1992 [Computer file]. Conducted by INRA (Europe), Brussels, on request of the European Commission. ZA 2nd ed. Cologne, Germany: Zentralarchiv für empirische Sozialforschung [producer and distributor], 1995. Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 1995.

Request for Information on Use of ICPSR/ZA Resources

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR/ZA participants' research activities, users of ICPSR/ZA data are requested to send to ICPSR or ZA respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

Data Disclaimer

The original collector of the data, ICPSR, ZA and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon upon such uses.

Questionnaire

The Euro-Barometer Survey Series

The Euro-Barometer surveys are the fruit of a unique program of cross-national and cross-temporal social science research. The effort began in early 1970, when the Commission of the European Communities began to carry out simultaneous surveys of the member nations of the European Community. Early efforts continued with two more surveys of the member nations in 1971 and 1973. In 1974, the Commission of the European Communities officially launched the biannual Euro-Barometer series of surveys, conducted in the Spring and Fall of each year. These surveys are designed to provide regular monitoring of the social and political attitudes of the publics in the European Community member nations, now twelve in number. Of primary concern are public awareness of and attitudes toward the Common Market and other European Community institutions and policies. Special topics of interest, such as consumer attitudes, the environment, gender roles, energy problems, poverty or health-related issues, have also been investigated intermittently.

Euro-Barometers available from ICPSR/ZA:

- European Communities Study, 1970 (ICPSR 7260 / ZA 0626)
- European Communities Study, 1971 (ICPSR 7275 / ZA 0627)

- Euro-Barometer 40: Poverty and Social Exclusion, October-November 1993 (ICPSR / ZA 2459) (*)

(*) Preliminary edition without machine-readable codebook

This series of surveys was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr. Karlheinz Reif and Dr. Anna Melich have directed the "Surveys, Research and Analysis" division of the Commission of the European Communities, under the Directorate General for "Information, Communication and Culture" (DG X). From the start, Ronald Inglehart of the University of Michigan has helped to make these data available to the social science community through the ICPSR. He wishes to acknowledge the support of the National Science Foundation, grant number SES 88-09098, for the cleaning and processing of the study.

Starting with Euro-Barometer 38.0 the ICPSR and the ZA are co-operating in the cleaning and processing of the study. Identical datasets, SPSS setups and English-language codebooks will be distributed by both archives.

Study Description

This round of Euro-Barometer surveys focused on the role that consumer, science, and entertainment issues play in the lives of residents of the European Community. Respondents were asked to describe their television viewing habits and to comment on whether they watched programs broadcast by satellite, their interest in a 24-hour European news channel, and their receptivity to purchasing and using HDTV (high definition television) technology. Participants in this Euro-Barometer were also asked a series of questions on consumer protection issues. They reported on topics such as recent European Community initiatives on product safety, labelling, and consumer credit; the problems they experienced as consumers over the last twelve months; what action they took if they wished to lodge a formal complaint; where they would turn for information on purchasing/selling products directly; their opinions regarding the uniformity of consumer protection policies across the Community; their level of satisfaction with current practices on the packaging and labelling of foodstuffs; and their knowledge of preservatives, additives, and colourings used in food products. Respondents also described their recent travel experiences, their use of products and services while travelling, and their opinions regarding the level of safety of these products and services when compared to those found in their own countries. Other questions focused on recent issues in the news of interest to respondents and which professions they respected the most. A final battery of questions probed attitudes toward science and technology issues: how informed respondents were in general, the sources of their information; recent visits to zoos, museums, and cultural institutions; opinions as to which subjects were "scientific" and which were not; and knowledge of scientific methods of investigation and the importance of science and technology in their lives. Finally, they were asked about the role the European Community plays in scientific research and how effective Community countries were in the promotion of science and technologies when compared with Japan and the United States.

As in previous Euro-Barometers, information was gathered on family income, number of people residing in the home, size of locality, region of residence, occupation of the head of household, and the respondent's age, sex, education, religion, subject social class standing, socio-professional status, and left-right political self-placement.

Sampling and Fieldwork

From November 3 to November 29, 1992, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Euro-Barometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the Commission of the European Communities. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R. Vandendriessche 18, B-1150 Brussels. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Euro-Barometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

In all, Euro-Barometer 38.1 interviewed 13,024 citizens of the 12 countries in the European Community. Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In this survey the extra country Norway was not added.

A multi-stage sampling design was used for this Euro-Barometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random.

In some countries, such as Great Britain, Republic of Ireland and Luxembourg, respondents were randomly selected from electoral registers. In each household, a respondent was selected by a random procedure, such as the first birthday method or the KISH grid method. Up to two recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes.

The firms responsible for carrying out each national survey are shown below, together with interviewing dates for each country. Users should contact these organizations for more detailed information regarding sampling methods.

Weighting Information

Nine weight variables are provided in this dataset: four Nation Weights (WEIGHT RESULT FROM TARGET, WEIGHT ADJUSTED TO STANDARD SIZE, WEIGHT SPECIAL UNITED KINGDOM, WEIGHT SPECIAL GERMANY), and four European Weights (WEIGHT EURO 6, WEIGHT EURO 10, WEIGHT EURO 12, WEIGHT EURO 12+).

Nation Weights incorporate post-stratification adjustments based on crosstabulations of national populations by sex, age, region, and size of locality. In some countries, crosstabulations of a higher dimension were used, by cross-tabulating with additional variables. Data for post-stratification were provided by EUROSTAT and the survey firms in each country. WEIGHT RESULT FROM TARGET and WEIGHT ADJUSTED TO STANDARD SIZE are for use in separate analyses of individual countries.

WEIGHT RESULT FROM TARGET reproduces the real number of cases for each country. British and Northern Irish as well as East and West German samples are weighted separately. This weight is equivalent to former NATION WEIGHT II (up to Euro-Barometer 31).

WEIGHT ADJUSTED TO STANDARD SIZE is equivalent to WEIGHT RESULT FROM TARGET adjusting all samples to the standard size of 1000 cases (respectively 300 for Northern Ireland and 500 for Luxembourg).

WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included and (unlike the former NATION WEIGHT I up to Euro-Barometer 31) all samples are adjusted to the standard size.

WEIGHT SPECIAL GERMANY adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever the united Germany is to be analyzed as a whole.

EURO WEIGHT 12+ includes an adjustment of each national sample in proportion to its share in the total population of the European Community, ages 15 and over. These post-stratification adjustments were based on population figures published by EUROSTAT in the Regional Statistics Yearbook. EURO WEIGHT 12+ is intended for use in analyses of the European Community nations as a whole.

EURO WEIGHT 12 is similar to EURO WEIGHT 12+, but excludes East Germany. In addition EURO WEIGHT 10 excludes Spain and Portugal. EURO WEIGHT 6 only refers to the six EC founder members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). The European weights equal zero for all excluded countries.

Table: Number of Respondents and Sums of Weights

	Number of Respondents	Sum of WEIGHT U.K.	Sum of WEIGHT GERMANY	Sum of EURO WEIGHT 12+
France	1.008	1.000	1.000	2.039
Belgium	1.043	1.000	1.000	376
The Netherlands	1.022	1.000	1.000	546
Germany	2.032	2.000	2.000	3.075
Germany (West)	(1.018)	(1.000)	(1.583)	(2.434)
Germany (East)	(1.014)	(1.000)	(417)	(641)
Italy	1.021	1.000	1.000	2.161
Luxembourg	500	500	500	14
Denmark	1.000	1.000	1.000	196
Ireland	1.000	1.000	1.000	122
United Kingdom	1.374	1.300	1.300	2.153
Great Britain	(1.066)	(1.267)	(1.000)	(2.098)
Northern Ireland	(308)	(32)	(300)	(55)
Greece	1.003	1.000	1.000	368
Spain	1.021	1.000	1.000	1.385
Portugal	1.000	1.000	1.000	363
Total	13.024	12.800	12.800	12.800

NOTE: Sums are rounded to the nearest whole number.

Codebook Information

The following abbreviations are used to indicate countries:

France	F
Belgium	B
The Netherlands	NL
Germany	D
Germany (West)	D-W
Germany (East)	D-E
Italy	I
Luxembourg	L
Denmark	DK
Ireland	IRE
United Kingdom	UK
Great Britain	GB
Northern Ireland	NIRL
Greece	GR
Spain	E
Portugal	P

The following example reproduces the information appearing in the machine-readable codebook for a typical variable; the numbers in brackets do not appear but are references to the descriptions:

V19 <SATISDEM> Q3 DEMOCRACY SATISFACTION
 <1> <2> <3>
 Location: 83 MD1: 0
 Width: 1 MD2: 5 Decimal Places: n
 <4> <5> <6>
 <7>

Q.3 On the whole, are you very satisfied, fairly satisfied, not very satisfied or not at all satisfied with the way democracy works in (YOUR COUNTRY)? Would you say you are ...?

<8>
 <Last trend: EB37.0 Q.3>
 <9> <10>
 1. Very satisfied
 2. Fairly satisfied
 3. Not very satisfied
 4. Not at all satisfied

 5. DK
 0. NA

- <1> Indicates the variable number. A serial variable number is assigned to each variable in the data collection.
- <2> Unique MNEMO-technical abbreviations are assigned to selected main trend variables in the data collection. This feature is not yet available in the present edition.
- <3> Indicates the abbreviated variable name (maximum of 40 characters) used to identify the variable for the user. These variable names are identical to corresponding SPSS variable labels. The variable label usually includes the question number assigned in the questionnaire.
- <4> Indicates the starting location and width of this variable when the data set is stored. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "Q3 DEMOCRACY SATISFACTION" is 1 column wide.
- <5> Indicates the code values of missing data. In this example, 0 (MD1) and 5 (MD2) or any code greater than 5, are missing data. Most analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- <6> Indicates the number (n) of decimal places defined for the respective variable.
- <7> This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the wording of the questionnaire item.
- <8> Comments in brackets are references which do not appear in the original questionnaire. They delineate explanatory text added by INRA or ZA/ICPSR. The present example refers to the last appearance of this question (Q.3 in Euro-Barometer 37.0). In the case of multiple response variables the corresponding full text (question) is referenced.
- <9> Indicates the code values occurring in the data for this variable.
- <10> Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Don't Know), "NA" (Not Ascertained), and "Inap." (Inappropriate).
- <11> The absolute frequencies for each country refer to the number of cases in the unweighted dataset. The relative frequencies for each country refer to the valid cases, i.e., the unweighted total number of cases reduced by the number of cases defined as missing data (M). The Sum refers to the total number of each country's cases in the unweighted dataset. Please notice that unlike other ICPSR codebooks all tables contain unweighted frequency counts.

Data Preparation and Formatting

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Euro-Barometer: NATION I, NATION III, REGION II, AGE RECODED, and AGE EDUCATION RECODED. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Euro-Barometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

The data file for this Euro-Barometer is available from ZA with a single logical record of 503 columns per respondent. The machine-readable (or hard-copy) codebook SPSS and SAS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling.

If the documentation for country-specific coding is provided by INRA in other languages than English, ZA documents the original language or field questionnaire version and supplies the English translation in brackets.

In Euro-Barometer 38.1 a split ballot (V405) was introduced to check alternative wording for questions Q.58, Q.60, Q.62 and Q.66. Results of these questions should always be analysed according to the split ballot.

V1 STUDY NUMBER

Location: 1
Width: 4

ZA/ICPSR Study Number

<Respective study number of the involved archive.>

V2 EDITION NUMBER

Location: 5
Width: 1

ZA/ICPSR Edition Number

<The number identifying the release edition of this dataset.>

1. Early release version
2. 1st codebook edition

V3 PART NUMBER

Location: 6
Width: 1

ZA/ICPSR Part Number

<The number identifying this part of a 1-part study.>

1. Eurobarometer 38.1

V4 ID SERIAL NUMBER

Location: 7
Width: 5

Sequential respondent identification number assigned by ZA

<A unique serial number is assigned to each respondent.>

V5 NATION I (UNITED KINGDOM)

Location: 12
Width: 2

Nation of interview I

<Twelve EC countries including separate samples for East and West Germany>

	Ungewichtet	
	Abs.	%
01. France	1008	7.74
02. Belgium	1043	8.01
03. Netherlands	1022	7.85
04. Germany - West	1018	7.82
05. Italy	1021	7.84
06. Luxembourg	500	3.84
07. Denmark	1000	7.68
08. Ireland	1000	7.68
09. United Kingdom	1374	10.55
10. Greece	1003	7.70
11. Spain	1021	7.84
12. Portugal	1000	7.68
13. Germany - East	1014	7.79
	<u>13024</u>	<u>100.00</u>

V6 WEIGHT SPECIAL UNITED KINGDOM

Location: 14
Width: 7 Decimal Places: 4

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

<This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All EC nation weights (Nation Weight II) are included. - Unlike the "Nation Weight I" in earlier Eurobarometers up to 31 this weight adjusts all samples to the standard size.>

V7 NATION II (GB AND NORTHERN IRELAND)

Location: 21
Width: 2

Nation of interview II

<The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.>

	Ungewichtet	
	Abs.	%
01. France	1008	7.74
02. Belgium	1043	8.01
03. Netherlands	1022	7.85
04. Germany - West	1018	7.82
05. Italy	1021	7.84
06. Luxembourg	500	3.84
07. Denmark	1000	7.68
08. Ireland	1000	7.68
09. Great Britain	1066	8.18
10. Northern Ireland	308	2.36
11. Greece	1003	7.70
12. Spain	1021	7.84
13. Portugal	1000	7.68
14. Germany - East	1014	7.79
	<u>13024</u>	<u>100.00</u>

V8 WEIGHT RESULT FROM TARGET

Location: 23
Width: 7 Decimal Places: 4

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

<This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. - This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.>

V9 WEIGHT ADJUSTED TO STANDARD SIZE

Location: 30
Width: 7 Decimal Places: 4

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

<This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.>

V10 NATION III (UNITED GERMANY)

Location: 37
Width: 2

Nation of interview III

<East and West Germany are coded together: United Germany.>

		Ungewichtet	
		Abs.	%
01.	France	1008	7.74
02.	Belgium	1043	8.01
03.	Netherlands	1022	7.85
04.	Germany	2032	15.60
05.	Italy	1021	7.84
06.	Luxembourg	500	3.84
07.	Denmark	1000	7.68
08.	Ireland	1000	7.68
09.	Great Britain	1066	8.18
10.	Northern Ireland	308	2.36
11.	Greece	1003	7.70
12.	Spain	1021	7.84
13.	Portugal	1000	7.68
		<u>13024</u>	<u>100.00</u>

V11 WEIGHT SPECIAL GERMANY

Location: 39
Width: 7 Decimal Places: 4

Nation Weight III (WEIGHT SPECIAL GERMANY)

<This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size.>

V12 WEIGHT EURO 6

Location: 46
Width: 7 Decimal Places: 4

European Weight I (WEIGHT EURO 6)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:
EURO 6 only refers to the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V13 WEIGHT EURO 10

Location: 53
Width: 7 Decimal Places: 4

European Weight II (WEIGHT EURO 10)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:
EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V14 WEIGHT EURO 12

Location: 60
Width: 7 Decimal Places: 4

European Weight III (WEIGHT EURO 12)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:
EURO 12 excludes East Germany (weighted by "zero"). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

V15 WEIGHT EUROPE 12 +

Location: 67
Width: 7 Decimal Places: 4

European Weight IV (WEIGHT EUROPE 12 +)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. - Unlike the "European Weight" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size.>

V16 Q1 ELECTORAL REGISTER

Location: 74

Width: 1

Q.1 Are you ...(NATIONALITY) ? (IF YES) Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

<Last trend: EB37.0 Q.1>

1. At present address
2. At another address
3. Don't know if registered
4. Does not appear at all
5. Is not ... (NATIONALITY) <CLOSE INTERVIEW>

V46 Q19K EC MAASTR TREATY YUGOSLAVIA

Location: 104 MD1: 0
Width: 1 MD2: 3

Q.19k <Opinion on European Unification issues>

In the framework of a common foreign and defence policy, the European Community should intervene militarily in former Yugoslavia, in order to re-establish peace.

V47 Q20 EUROPEAN ECONOMIC AREA - HEARD

Location: 105 MD1: 0
Width: 1 MD2: 3

Q.20 Austria, Finland, Iceland, Lichtenstein, Norway, Sweden and Switzerland form the European Free Trade Association - EFTA. The European Community and EFTA have decided to create together the "European Economic Area" from 1st January 1993, that is the same time as the Single European Market of the European Community. Have you ever heard of this "European Economic Area" or not?

V77 Q28 TELEVISION - HDTV INTEREST

Location: 135 MD1: 0
Width: 1 MD2: 5

F.28 There will soon be television programmes with pictures of almost the same quality as in cinemas: this is known as "high definition" television. A new type of television set will be needed to receive these programmes. Would you personally be very interested, somewhat interested, not very interested, not at all interested in buying a high definition television set?

1. Very interested
2. Somewhat interested
3. Not very interested
4. Not at all interested

V216 Q58A SCIENCE OPINION BIOLOGY(A)

Location: 278 MD1: 0
Width: 1 MD2: 7

(ASK ALL)

Q.58 (SPLIT BALLOT A)

People can have different opinions about what is scientific and what is not.

I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so. (SHOW CARD)

Q.58 (SPLIT BALLOT B)

People can have different opinions about what is scientific and what is not.

I am going to read out a list of subjects. For each one tell me how scientific you think it is by the scale of this card. Number 5 means that you think it is "very scientific" and number 1 that it is "not at all scientific". The other numbers mean somewhere in between. Just tell me for each subject the number you think best describes how scientific the subject is. If you have never heard of the subject don't hesitate to say so. (SHOW CARD)

V232 Q59 SCIENTIFIC DRUG TEST EVALUATION

Location: 294 MD1: 0
 Width: 1 MD2: 3

Q.59 Let us imagine that two scientists want to know if a certain drug is effective against high blood pressure.

A. The first scientist wants to give the drug to 1000 people with high blood pressure and see how many of them experience lower blood pressure levels.

B. The second scientist wants to give this drug to 500 people with high blood pressure, and not give this drug to another 500 people with high blood pressure, and see how many in both groups experience lower blood pressure levels.

In your opinion, which is the better way to test this drugs?

1. A. First scientist - all 1000 get drug
2. B. Second scientist - 500 get drug, 500 don't get drug

V233 Q60 KNOWLEDGE SCIENTIFIC METHODS(A)

Location: 295 MD1: 0
Width: 1 MD2: 4

Q.60 (SPLIT BALLOT A)

Suppose a machine is breaking down repeatedly. It is suspected that the material from which a particular part is made, is responsible for the breakdowns. There are different ways of investigating this problem.

Which one do you think scientists would be most likely to use? (SHOW CARD - ONE ANSWER POSSIBLE)

<Last trend modified: EB31 Q.449>

1. Only talk to the machine operators and get their opinion
2. Only use their own scientific knowledge to decide how good the material is
3. Make the same part from different materials, put them in the machine, one after the other, and then compare what happens in each case

V384 D29 INCOME HH

Location: 464 MD1: 00
Width: 2 MD2: 97

D.29 We would also like some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups. (SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc.. Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

France

V397 C1 OPINION LEADERSHIP INDEX

Location: 488 MD1: 0

Width: 1

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilization Index 1

<This index is based on the answers to the following two questions: "When you hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.8) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.9). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled --. Middle categories (+ and -) are constituted correspondingly.>

<This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, The Silent Revolution: Changing Values and Political Styles among Western Publics (Princeton University Press, 1977).>

V398 C3 EC SUPPORT TYPOLOGY - EUROP ATTITUDES

Location: 489

Width: 1

C.3 TYPOLOGY OF EUROPEAN ATTITUDES

<The Typology of European attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much?" (Q.12 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Community is: a good thing, a bad thing, or neither good nor bad?" (Q.13 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for...". Ambivalent attitudes: MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against..." or MEMBERSHIP "bad" and UNIFICATION "for ...". Negative attitudes: MEMBERSHIP "bad" and UNIFICATION: "against...">

1. Positive <coded 1 for V30 and either 1 or 2 for V29>

V399 C4 SOCIO PROF STATUS (OCCUPATION RECODE)

Location: 490 MD1: 0
Width: 2

C.4 SOCIO PROFESSIONAL STATUS

<Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15a) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-Marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15a). For those not in paid work, "former occupation" (D.15b) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21a) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21b) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses.>

01. Farmer and fisher
02. Professionals
03. Owner of a shop, craftsmen, other self employed position
04. Business proprietors, owner of a company
05. Employed professional

V400 C6 EC SUPPORT - COMMITMENT

Location: 492

Width: 1

C.6 COMMITMENT TO THE COMMON MARKET

Support for the European Community Index

<This index was constructed from responses to the questions: "Generally speaking, do you think that (your country's) membership of the European Community (Common Market) is ... a good thing, a bad thing, or neither good nor bad?" (Q.13) and "If you were told tomorrow that the European Community (Common Market) had been scrapped, would you be very sorry about it, indifferent or very relieved?" (Q.15).>

1. Strong opposition <coded 3 for V30 and 3 for V32>
2. Moderate opposition <coded 3 for V30 and 2, 4 or 0 for V32; or coded 2, 4 or 0 for V30 and 3 for V32>
3. Neutral position <coded 2, 4 or 0 for V30 and 2 for V32; or coded 2 for V30 and 2, 4, or 0 for V32; or coded 1 for V30 and 3 for V32; or coded 3 for v30 and 1 for V32; or coded 0 or 4 for V30 and 0 or 4 for V32>
4. Moderate support <coded 1 for V30 and 2, 4 or 0 for V32; or coded 2, 4 or 0 for V30 and 1 for V32>
5. Strong support <coded 1 for V30 and 1 for V32>

V401 C11 MEDIA USE

Location: 493 MD1: 0

Width: 1

C.11 MEDIA USE

<This index is based upon answers to question 0.11 (V26-V28): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?" It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every day or several times a week, the two others, not more than once or twice a week; --- The three media no more than once or twice a week.>

1. +++ <Coded 1 or 2 for V26, V27 and V28>
2. ++ <Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable>
3. -- <Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables>
4. --- <Coded 3, 4 or 5 for V26, V27 and V28>
0. DK/NA <Coded 0 or 6 for either V26 or V27 or V28>

V402 C12 EUROPEAN SOCIAL GRADE

Location: 494 MD1: 0
Width: 1

C.12 European Social Grade (ESOMAR 7-point scale)

<This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 employed position, working mainly at a desk
- E9 business proprietors, owner (full/partner) of company (5 employees or less)
- E10 student
- E11 employed position, not at a desk but travelling or in a service job
- E12 farmer and fisherman
- E13 responsible for ordinary shopping and looking after the home, housewife
- E14 supervisor and skilled manual worker
- E15 other (unskilled) manual worker, servant
- E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durables is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3.>

<This scale on the basis of all active and non-active main income earners (combination of input variables I, II and III) was included as created by the principal investigator (INRA). For more details see: Commission of the European Communities, EUROBAROMETER No. 38, Report December 1992, page A70.>

V403 C13 LIFE CYCLE GROUPS

Location: 495 MD1: 0
Width: 1

C.13 LIFE CYCLE GROUPS

<This variable combines answers to questions D.11, D.13, D.19a, D.19b and D.15a: Respondents aged 15-34, neither head of household nor responsible for purchases and not in paid work are classified as "DEPENDENT". Respondents aged 15-34 and head of household or responsible for purchases, without children aged 0-15 in the household; or aged 15-34, neither head of household nor responsible for purchases, but in paid work are classified as "PRE-FAMILY". Respondents aged 15-34, head of household or responsible for purchases and with children aged 0-15 in household are classified as "YOUNG FAMILY". Respondents aged 35+, head of household or responsible for purchases and with children aged 0-15 in household are classified as "MATURE FAMILY". Respondents aged 35-54, head of household or responsible for purchases, but without children aged 0-15 in household; or aged 35-54 and neither head of household nor responsible for purchases are classified as "POST-FAMILY / MATURE". Respondents aged 55 and more, head of household or responsible for purchases, without children aged 0-15 in household; or aged 55 and more and neither head of household nor responsible for purchases are classified as "POST-FAMILY / AGED".>

1. Dependent <Coded 1 or 2 for V357 and not coded 1 neither for V374 nor V375 and not coded 5-18 for V370>
2. Pre-family <Coded 1 or 2 for V357 and coded 1 either for V374 or V375 and not coded 1-9 for v359; or coded 1 or 2 for V357 and not coded 1 neither for V374 nor V375 and coded 5-18 for V370>
3. Young family <Coded 1 or 2 for V357 and coded 1 either for V374 or V375 and coded 1-9 for V359>
4. Mature family <Coded 3-6 for V357 and coded 1 either for V374 or V375 and coded 1-9 for V359>
5. Post-family / mature <Coded 3 or 4 for V357 and coded 1 either for V374 or V375 and not coded 1-9 for V359; or coded 3 or 4 for V357 and not coded 1 neither for V374 nor V375>
6. Post-family / aged <Coded 5 or 6 for V357 and coded 1 either for V374 or V375 and not coded 1-9 for V359; or coded 5 or 6 for V357 and not coded 1 neither for V374 nor V375>
