BIBLIOGRAPHIC CITATION

Publications based on ICPSR/ZA data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

Reif, Karlheinz, and Eric Marlier. EURO-BAROMETER 41.0: TRADE ISSUES, BLOOD DONATION, AIDS, AND SMOKING, MARCH- MAY 1994 [Computer file]. Conducted by INRA (Europe), Brussels. 4th ICPSR ed. REQUEST FOR INFORMATION ON USE OF ICPSR/ZA RESOURCES

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR/ZA participants' research activities, users of ICPSR/ZA data are requested to send to ICPSR or ZA respectively, bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

DATA DISCLAIMER

The original collector of the data, ICPSR, ZA, and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

PRELIMINARY REMARK

As a result of the increased number and volume of recent surveys connected with the Eurobarometer survey series, the Inter-university Consortium for Political and Social Research (ICPSR) and the Zentralarchiv fuer Empirische Sozialforschung (ZA) entered into a cooperative arrangement for the production and distribution of these important data collections. In conjunction with the entrance of Sweden into the European Union in 1995 the Swedish Social Science Data Services (SSD) joined this cooperative effort as well. In sharing the responsibility for Eurobarometer processing, the cooperating archives ensure that all users receive Eurobarometer data sets and codebooks in standard formats, although each archive will employ its own study numbers. The present codebook is a product of this joint endeavour.

Since this cooperation presupposes common standards for data and codebook preparation, the formatting may in some details diverge from the usual ICPSR, ZA, or SSD standards. For example, all frequency tables in this codebook are based on unweighted data, while earlier ICPSR codebooks generally contain only weighted frequency counts.

v

EUROBAROMETER (a.k.a. EURO-BAROMETER) SURVEY SERIES

These surveys are the products of a unique program of cross-national and crosstemporal social science research. The effort began in early 1970, when the Commission of the European Community sponsored simultaneous surveys of the publics of the European Community. These surveys were designed to measure public awareness of, and attitudes toward, the Common Market and other European Community institutions, in complementary fashion. They also probed the goals given top priority for one's own nation.

These concerns have remained a central part of the European Community's research efforts--which were carried forward in the summer of 1971 with another six-nation survey that gave special attention to agricultural problems. These themes were of central interest again in a survey of the publics of the European Community countries--then nine in number--carried out in September 1973.

After 1973, the surveys took on a somewhat broader scope in content as well as in geographical coverage, with measures of subjective satisfaction and the perceived quality of life becoming standard features of the European Community public opinion surveys. In 1974, the Commission of the European Community launched the Eurobarometer series of the surveys, designed to provide a regular monitoring of the social and political attitudes of the publics of the nine member-nations: France, Germany, the United Kingdom, Italy, the Netherlands, Belgium, Denmark, Ireland, and Luxembourg.

These Eurobarometers are carried out in the spring and fall of each year. In addition to obtaining regular readings of support for European integration and the perceived quality of life, each of the Eurobarometers has explored a variety of special topics. Also, attitudes toward the organization and role of the European Parliament have been explored in each Eurobarometer beginning with Barometer 7 in the spring of 1977.

The Eurobarometer surveys have included Greece since Autumn 1980 (Number 14), Portugal and Spain since Autumn 1985 (Number 24), the former German Democratic Republic since Autumn 1990 (Number 34), Norway since the fall of 1991 (Number 36), Finland since the spring of 1993 (Number 39), and Sweden and Austria since the fall of 1994 (Number 42).

Note that beginning with Eurobarometer 43 and Central and Eastern Eurobarometer 6, the archival survey titles in these

vi

ICPSR series no longer contain a hyphen separating "Euro" and "Barometer", in keeping with current usage. Other archives may follow different naming practices for this survey series.

- Eurobarometer 46.1: Modern Biotechnology, Privacy on Computer Networks, and the Common European Currency, October-November 1996 (ICPSR 6940)

This series of surveys was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr. Karlheinz Reif and Dr. Anna Melich have directed the "Surveys, Re-

search and Analysis" division of the Commission of the European Community, under the Directorate General for Information, Communication and Culture. In 1994, Eric Marlier became a principal investigator of this series. From the start, Ronald Inglehart of the University of Michigan has helped make these data available to the social science community through the ICPSR. He wishes to acknowledge the support of the National Science Foundation, grant numbers SES 85-12100 and SES 88-09098 for the cleaning and processing of the study.

x

STUDY DESCRIPTION

This round of Euro-Barometer surveys queried respondents on standard Euro-Barometer measures such as public awareness of and attitudes toward the Common Market and the European Union (EU), and focused on perceptions about and factors affecting blood and plasma donation.

Questions solicited opinions about the way blood and plasma are collected and handled, reasons for donating, understanding of the differences between blood and plasma, the necessity of rewards for donating, and sources of information about blood or plasma donation.

Respondents were also surveyed about their perceptions of product quality based on country of manufacture, cross-border purchases and customs experiences, a single European currency, women's opinions on EU matters, tobacco smoking habits, AIDS risks, and perceived cancer risks of food products.

On EU matters, respondents were asked how well informed they felt about the EU, what sources of information about the EU they used, whether their country had benefited from being an EU member, and the extent of their personal interest in EU matters. This survey also includes respondent opinions and party preferences for the June 1994 European elections.

Demographic and other background information was gathered on number of people residing in the home, size of locality, home ownership, trade union membership, region of residence, and occupation of the head of household, as well as the respondent's age, sex, marital status, education, occupation, work sector, religion, religiosity, subjective social class, left-right political self-placement, and opinion leadership.

SAMPLING AND FIELDWORK (1)

Between March 8 and May 10, 1994, INRA (EUROPE), a European Network of Market and Public Opinion Research Agencies, carried out wave 41.0 of the STANDARD EURO-BAROMETER, on request of the EUROPEAN COMMISSION.

The EURO-BAROMETER 41.0 covers the population of the respective nationalities, aged 15 years and over, in each of the Member States of the European Community. In addition, separate national surveys were conducted independently in Norway and Finland. The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EC country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from all "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the national, resident population in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's homes and in the appropriate national language.

xvii

COMPARISON BETWEEN SAMPLES AND UNIVERSES
AND WEIGHTING OF THE DATA (1)

For each of the countries a comparison between the sample and the universe was carried out. The Universe description was derived from EUROSTAT population data.

For all EC member-countries a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. As such in all countries, minimum sex, age, region NUTS II and size of locality were introduced in the iteration procedure.

For international weighting (i.e. EU averages), INRA (EUROPE) applies the official population figures as published by EUROSTAT in the Regional Statistics Yearbook of 1989.

In addition, this Euro-Barometer contains two oversamples each with their own weight variables. These oversamples and the appropriate weight variables to use are described next.

Non-national EU Citizens Oversample

In this Euro-Barometer an oversample of non-national but EU citizens was added for experimental purposes. On top of the normal 1000 national respondents, a varying number of EU citizens has been added which had to have one of the other eleven nationalities. This oversampling does not apply for Norway and Finland. In total 373 extra interviews were made in accordance to the proportion of non-nationals in each country.

In order to produce results for nationals only (for a valid comparison with previous Euro-Barometer surveys), one should filter the data with V538 and use weights "W1" to "W8" (V6 V8 V9 V11 to V15).

In order to focus on the entire target (i.e., including non-nationals) one should filter the data using variable V536 and weights "WN1" to "WN8" (V18 to V25). As Finland and Norway are exceptions they should be weighted using V16 (Norway) and V17 (Finland) respectively. (Filter variable V535 includes Norway and Finland).

xviii

Filter variables V535, V536 and V538 do all exclude the second oversample of "people responsible for shopping."

People Responsible for Shopping Oversample

Also, another oversample of "people responsible for shopping" (D19A) was added. 300 extra-respondents per country (except Northern Ireland, Finland and Norway) were asked only a limited subset of questions: the substantive questions Q.1 to Q.15, a selection of demographics (D.7, D.8, D.10, D.11, D.12, D.14, D.15A/B, D.19A/B, D.25 and D.29) and the usual protocol variables (P.1 to P.7).

In order to analyse these questions, both in the standard and in the oversample, one should filter the data using split variable V537 and weights "W01" to "W08" (V26 to V33). V537 is coded '1' for oversample respondents and standard respondents (both nationals and non-nationals) that are "responsible for shopping," i.e., coded '1' in V451 (D19A). Finland and Norway are not included in the "people responsible for shopping" oversample.

The firms responsible for carrying out each national survey are shown below, together with the interviewing dates for each country.

WEIGHTING INFORMATION

Nation Weights

Ten nation weight variables are provided in this dataset: WEIGHT SPECIAL UNITED KINGDOM (V6), WEIGHT RESULT FROM TARGET (V8), WEIGHT ADJUSTED TO STANDARD SIZE (V9), WEIGHT SPECIAL GERMANY (V11), WEIGHT EURO 6 / 10 / 12 (V12, V13, V14), WEIGHT EURO 12 + (INCLUDING EAST GERMANY) (V15), WEIGHT RESULT FROM TARGET NORWAY ONLY (V16), and WEIGHT RESULT FROM TARGET FINLAND ONLY (V17).

WEIGHT RESULT FROM TARGET and WEIGHT ADJUSTED TO STANDARD SIZE are for use in separate analyses of individual countries.

WEIGHT RESULT FROM TARGET contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each country. Norway and Finland are not included (weighted by "zero").

This weight corresponds to "NATION WEIGHT II" in earlier Euro-Barometers up to 31.

WEIGHT ADJUSTED TO STANDARD SIZE corresponds to "WEIGHT RESULT FROM TARGET" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Norway and Finland are not included (weighted by "zero").

Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

WEIGHT SPECIAL UNITED KINGDOM adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All nation weights are included. Norway and Finland are weighted by "zero".

Unlike the "NATION WEIGHT I" in earlier Euro-Barometers up to 31, this weight adjusts all samples to the standard size.

WEIGHT SPECIAL GERMANY adjusts the East and West German samples to their respective proportions in the United Germany. All nation weights are included and all samples adjusted to the standard size. Norway and Finland are weighted by "zero".

xxii

WEIGHT EURO 6 / 10 / 12 contain weights that adjust each national sample in proportion to its nation's share in the total population of the European community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). EURO 10 excludes East Germany, Spain and Portugal, Euro 12 excludes East Germany (weighted by "zero").

WEIGHT EURO 12 + (INCLUDING EAST GERMANY) contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Norway and Finland are not included (weighted by "zero").

Unlike the "EUROPEAN WEIGHT" in earlier Euro-Barometers up to 31A, this weight contains the adjustment to the standard size.

WEIGHT RESULT FROM TARGET NORWAY ONLY contains weights that adjust the weighted sample to make it representative for Norway (all other countries are weighted by "zero"). It reproduces the real number of cases.

WEIGHT RESULT FROM TARGET FINLAND ONLY contains weights that adjust the weighted sample to make it representative for Finland (all other countries are weighted by "zero"). It reproduces the real number of cases.

These weight variables include the national weights for each sample and contain the adjustment to the standard size.

Non-national EU Citizens Oversample Weights

WN1 through WN8 (V18 through V25) are analogous to V6, V8, V9, and V11 through V15 described above. These weight variables are intended for use with filter variable V536 to weight the Non-national EU Citizens Oversample plus the National sample. Finland and Norway are not included in WN1 through WN8 and should be weighted using V16 (Norway) and V17 (Finland). See "Comparison Between Samples and Universes and Weighting of the Data" above for further information.

xxiii

People Responsible for Shopping Oversample Weights

W01 through W08 (V26 through V33) are analogous to V6, V8, V9, and V11 through V15. These weight variables are intended for use with filter variable V537 to weight the "people responsible for shopping" oversample. Finland and Norway are not included in W01 through W08. See "Comparison Between Samples and Universes and Weighting of the Data" above for further information.

Table: Number of Respondents and Sums of Weights*

	Number of Respondents	V6 Sum of WEIGHT U.K.	V11 Sum of WEIGHT GERMANY	V15 Sum of EURO WEIGHT 12+
France	1,335	1,000.00	1,000.00	2,039.47
Belgium	1,393	1,000.00	1,000.00	376.38
Netherlands	1,340	1,000.00	1,000.00	546.31
Germany	2,838	2,000.00	2,000.00	3,075.09
East Germany	(1,423)	(1,000.00)	(416.66)	(640.63)
West Germany	(1,415)	(1,000.00)	(1,583.34)	(2,434.46)
Italy	1,358	1,000.00	1,000.00	2,161.14
Luxembourg	925	500.00	500.00	14.25
Denmark	1,305	1,000.00	1,000.00	195.87
Ireland	1,364	1,000.00	1,000.00	121.61
United Kingdom	1,698	1,299.99	1,300.00	2,152.58
Great Britain	(1,392)	(1,267.50)	(1,000.00)	(2,098.01)
Northern Ireland	(306)	(32.49)	(300.00)	(54.57)
Greece	1,312	999.99	999.99	368.43
Spain	1,303	1,000.00	1,000.00	1,385.46
Portugal	1,302	1,000.00	1,000.00	363.40
Norway	1,003	-	-	-
Finland	1,001	-	-	-
Total	19,477	12,799.98	12,799.99	12,800.00

* The "Number of Respondents" column represents the total sample in each country, including any oversamples. The sums of weights are based upon the national samples only and are rounded to two decimal places.

- [1] VARIABLE NUMBER
This is the variable number for this variable. A variable number is assigned to each variable in the data collection and is used to associate the appropriate data definition statements.
- [2] ABBREVIATED VARIABLE NAME
This is an abbreviated variable name (maximum of 40 characters) used to identify the variable for the user. A list of the variable names can be found in the variable description list.
- [3] LOCATION AND WIDTH OF VARIABLE
Indicates the starting location and width of this variable when the data are stored in LRECL format.
- [4] MISSING DATA VALUES
Indicates the code values that may be considered as missing data. In this example, the code 0 and codes greater than or equal to 5 are missing data. An alternative statement found in other variables is "NO MISSING DATA CODES." Some analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role if so desired.
- [5] QUESTION TEXT
This is the full text, supplied by the investigator, associated with the variable. The question text and the numbers and letters that may appear at the beginning reflect the original wording of the questionnaire item. Text added by ICPSR/ZA usually appears within angle "<>" brackets.
- [6] CODE VALUES
Lists the code values occurring in the data for discrete variables. Variables whose values represent a range of numbers are usually not fully listed.
- [7] CODE DEFINITIONS
Lists the textual definitions of the associated codes. This text is also supplied by the original investigator and indicates the response represented by

xxvii

the code values. These definitions may also be augmented by ICPSR as necessary.

- [8] MISSING DATA VALUES AND DEFINITIONS
ICPSR has grouped these pairs of values and definitions in this documentation for clarity and ease of use. Abbreviations commonly used in the code definitions are "DK" (Do Not Know), "NA" (Not Ascertained), and "INAP" (Inappropriate).
- [9] UNWEIGHTED FREQUENCIES TABLE
ZA has included frequencies crosstabulated by the appropriate NATION variable. Unlike previous ICPSR codebooks, this codebook includes unweighted frequencies. Oversample data are excluded from the frequency counts except if explicitly indicated.

The following abbreviations are used to indicate countries:

France	F
Belgium	B
Netherlands	NL
Germany	D
West Germany	D-W
East Germany	D-E
Italy	I
Luxembourg	L
Denmark	DK
Ireland	IRE
United Kingdom	UK
Great Britain	GB
Northern Ireland	NIRL
Greece	GR
Spain	E
Portugal	P
Norway	N
Finland	FIN

xxix

DATA PREPARATION AND FORMATTING

The data received by ICPSR from INRA (Europe) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ICPSR.

ICPSR has either added "<NA>" codes to indicate responses that had no code values in the original data (system missing values) or recoded variables to the "<NA>" value if the variable had been inappropriately coded. Illegal (wild) codes which ICPSR has been unable to document have been labeled as "<Undocumented Code>" where they appear in this codebook. In some instances, for explanatory purposes, ICPSR has retained the descriptions of codes which are not used, but were available in the questionnaire. Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this codebook and ICPSR's machine-readable documentation is taken from INRA (Europe)'s English language version of the questionnaire. Whenever a discrepancy occurs between INRA (Europe)'s codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed in the ICPSR documentation. Angle brackets (<>) appearing in this codebook delineate explanatory text added by ICPSR.

The data file for this Euro-Barometer is available from ICPSR in LRECL format. The data file is constructed with a single logical record of 752 columns per respondent. SAS and SPSS data definitions statements have also been prepared by ICPSR for the LRECL data file.

V1 ARCHIVE STUDY NUMBER

Location: 1
Width: 4

Archive Study Number

The respective archive has attached this as a unique data collection identification number.

<Actual number is coded.>

V2 ARCHIVE EDITION NUMBER

Location: 5
Width: 1

ICPSR Edition Number

The number identifying the release edition of this dataset.

4. Fourth ICPSR Edition -- February 1998

V3 ARCHIVE PART NUMBER

Location: 6
Width: 1

ICPSR Part Number

The number identifying this part of a 1-part study.

1. Part one of a one-part study

V4 ID SERIAL NUMBER

Location: 7
Width: 5

Sequential respondent identification number assigned by ICPSR

A unique identification number is assigned to each respondent.

<Actual number is coded.>

V5 NATION I (UNITED KINGDOM)

Location: 12
Width: 2

Nation of interview

<This variable identifies the E.C. nation in which the respondent was interviewed. A unique numeric code is assigned to each of the 12 E.C. countries.>

<Frequencies including non-nationals and oversample data>

		Ungewichtet	
		Abs.	%
01.	France	1335	6.85
02.	Belgium	1393	7.15

16. Finland	1001	5.14
	<u>19477</u>	<u>100.00</u>

V8 W3 WEIGHT RESULT FROM TARGET (NAT)

Location: 23
Width: 7 Decimal Places: 4

Weight Result from Target

<This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway and Finland are weighted by "zero".

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.>

V9 W4 WEIGHT ADJUSTED TO STAND SIZE (NAT)

Location: 30
Width: 7 Decimal Places: 4

Weight Adjusted to Standard Size

<This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway and Finland are weighted by "zero".>

V10 NATION III (UNITED GERMANY)

Location: 37
Width: 2

Nation III (East and West Germany)

<East and West Germany are coded together: United Germany.>

<Frequencies including non-nationals and oversample data>

	Ungewichtet	
	Abs.	%
01. France	1335	6.85
02. Belgium	1393	7.15

15. Finland	1001	5.14
	<u>19477</u>	<u>100.00</u>

V11 W1 WEIGHT SPECIAL GERMANY (NAT)

Location: 39
Width: 7 Decimal Places: 4

Weight Special Germany

<This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights are included and all samples adjusted to the standard size. Norway and Finland are weighted by "zero".>

V12 W5 WEIGHT EURO 6 (NAT)

Location: 46
Width: 7 Decimal Places: 4

European Weight 6

<This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.>

V13 W6 WEIGHT EURO 10 (NAT)

Location: 53
Width: 7 Decimal Places: 4

European Weight 10

<This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight excludes East Germany, Spain and Portugal. This weight includes national weighting for each sample adjusted to the standard size.>

V14 W7 WEIGHT EURO 12 (NAT)

Location: 60
Width: 7 Decimal Places: 4

European Weight 12 (Great Britain and Northern Ireland together)

<This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries as categorized by Nation I (V5). This weight excludes East Germany.>

V15 W8 WEIGHT EUROPE 12+ (NAT)

Location: 67
Width: 7 Decimal Places: 4

European Weight 12+

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Norway and Finland are excluded (weighted by "zero"). Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31, this weight contains the adjustment to the standard size.>

V16 W3.1 WEIGHT NORWAY

Location: 74
Width: 7 Decimal Places: 4

Weight Result From Target Norway Only

<This variable contains weights that adjust the weighted sample to make it representative for Norway. It reproduces the real number of cases. All other countries are weighted by "zero".>

V17 W3.2 WEIGHT FINLAND

Location: 81
Width: 7 Decimal Places: 4

Weight Result From Target Finland Only

<This variable contains weights that adjust the weighted sample to make it representative for Finland. It reproduces the real number of cases. All other countries are weighted by "zero".>

V18 WN1 WEIGHT SPEC GERMANY (NAT+N-NAT)

Location: 88
Width: 7 Decimal Places: 4

WN_1: Weight Special Germany
(Nationals plus Non-nationals)

<This variable is analogous to V11, Weight Special Germany, but is for the analysis of the combined national and non-national samples. Norway and Finland are weighted by "zero". Variable V536 should be used as a filter when applying this weight variable.>

V19 WN2 WEIGHT SPEC UK (NAT+N-NAT)

Location: 95
Width: 7 Decimal Places: 4

WN_2: Weight Special UK
(Nationals plus Non-nationals)

<This variable is analogous to V6, Weight Special UK, and is for the analysis of the combined national and non-national samples. Norway and Finland are weighted by "zero". Variable V536 should be used as a filter when applying this weight variable.>

V20 WN3 WEIGHT RES F TARGET (NAT+N-NAT)

Location: 102
Width: 7 Decimal Places: 4

WN_3: Weight Result from Target
(Nationals plus Non-nationals)

<This variable is analogous to V8, Weight Result from Target, but is for the analysis of the combined national and non-national samples. Norway and Finland are weighted by "zero". V536 should be used as a filter when applying this weight variable.>

V21 WN4 WEIGHT ADJ STD SIZE (NAT+N-NAT)

Location: 109
Width: 7 Decimal Places: 4

WN_4: Weight Adjusted Standard Size
(Nationals plus Non-nationals)

<This variable is analogous to V9, Weight Adjusted to Standard Size, but is for the analysis of the combined national and non-national samples. Norway and Finland are weighted by "zero". V536 should be used as a filter when applying this weight variable.>

V22 WN5 WEIGHT EURO 6 (NAT+N-NAT)

Location: 116
Width: 7 Decimal Places: 4

WN_5: European Weight 6
(Nationals plus Non-nationals)

<This variable is analogous to V12, European Weight 6, but is for the analysis of the combined national and non-national samples. V536 should be used as a filter when applying this weight variable.>

V23 WN6 WEIGHT EURO 10 (NAT+N-NAT)

Location: 123
Width: 7 Decimal Places: 4

WN_6: European Weight 10
(Nationals plus Non-nationals)

<This variable is analogous to V13, European Weight 10, but is for the analysis of the combined national and non-national samples. V536 should be used as a filter when applying this weight variable.>

V24 WN7 WEIGHT EURO 12 (NAT+N-NAT)

Location: 130
Width: 7 Decimal Places: 4

WN_7: European Weight 12
(Nationals plus Non-nationals)

<This variable is analogous to V14, European Weight 12, but is for the analysis of the combined national and non-national samples. V536 should be used as a filter when applying this weight variable.>

V25 WN8 WEIGHT EUROPE 12+ (NAT+N-NAT)

Location: 137
Width: 7 Decimal Places: 4

WN_8: European Weight 12+
(Nationals plus Non-nationals)

<This variable is analogous to V15, European Weight 12+, but is for the analysis of the combined national and non-national samples. V536 should be used as a filter when applying this weight variable.>

V26 W01 WEIGHT SPEC GERMANY (NAT+N-NAT+OV)

Location: 144
Width: 7 Decimal Places: 4

W0_1: Weight Special Germany
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V11, Weight Special Germany, and is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.>

V27 W02 WEIGHT SPEC UK (NAT+N-NAT+OV)

Location: 151
Width: 7 Decimal Places: 4

W0_2: Weight Special UK
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V11, Weight Special Germany, and is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.>

V28 W03 WEIGHT RES F TARGET (NAT+N-NAT+OV)

Location: 158
Width: 7 Decimal Places: 4

W0_3: Weight Result from Target
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V8, Weight Result from Target, but is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.>

V29 W04 WEIGHT ADJ STD SIZE (NAT+N-NAT+OV)

Location: 165
Width: 7 Decimal Places: 4

W0_4: Weight Adjusted Standard Size
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V , Weight Adjusted to Standard Size, but is for the analysis of the national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.>

V30 W05 WEIGHT EURO 6 (NAT+N-NAT+OVER)

Location: 172
Width: 7 Decimal Places: 4

W0_5: European Weight 6
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V12, European Weight 6, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.>

V31 W06 WEIGHT EURO 10 (NAT+N-NAT+OV)

Location: 179
Width: 7 Decimal Places: 4

W0_6: European Weight 10
(Nationals plus Non-nationals plus Oversample)

<This variable is analogous to V13, European Weight 10, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.>

V108 Q37 VOTE INTENTION EUROPEAN PARLIAMENT

Location: 276 MD1: 00
Width: 2 MD2: 90

Q.37. IF CODE 1 OR 2 IN Q.34

And which party would you be most likely to vote for at these European elections ?

<The original INRA version of Q37 has apparent errors in coding for responses from Great Britain and Spain. Accordingly, ICPSR has made the following recodes to Q37:

Great Britain has data values and labels for 7 actual parties. The original Q.37 has: value 8 = 1 case, value 9 = 1 case, value 10 = 1 case, value 11 = 131 cases and value 12 = 18 cases. We believe that value 8 really equals "other party," value 9 = "would spoil your vote," value 10 = "would not vote," value 11 = "DK" and value 12 = "no answer." We left codes 1-7 untouched but changed 8 to 90, 9 to 95, 10 to 96, 11 to 98, and 12 to 0.

Spain has data values for codes 1-8, 10-16, and 18-25. According to the precodes, Spain has 24 categories. However, the original Spanish questionnaire does contain 25 categories (25 equals "no answer"). We used these categories for our recode: codes 1-20 remained unchanged (actual parties), 21 became 90 ("other party"), 22 became 95 ("would vote blank/spoil vote"), 23 became 96 ("would not vote"), 24 became 98 ("DK"), and 25 became 0 ("no answer").

All other countries were recoded according to the scheme: 1-19 = unchanged (actual parties), 20 = 90 ("other party"), 21 = 95 ("would vote blank/spoil vote"), 22 = 96 ("would not vote"), 23 = 98 ("DK", and 25 = 0 ("no answer").>

ASK ALL

Q.54. In the near future, the (EC & EU (EC)) plans to replace the (NATIONAL) currency by the ECU which will then be the single currency in member countries. This replacement will have effects on various areas. For each of the effects which I am going to mention, please tell me if it seems to you important or not important ?

V272 Q72 SMOKING AND PUBLIC REGULATION
--

Location: 447 MD1: 0
Width: 1 MD2: 3

Q.72. Which of the following statements comes closest to your own opinion (SHOW CARD** -- READ OUT) ?

1. A. Smoking is strictly a matter for the individual. Public bodies should leave it entirely to people to make up their own minds
2. B. Smoking affects other people too. It should be regulated by public bodies

V360 Q93 BLOOD DONATION - TRADE RULES

Location: 537 MD1: 0
Width: 1 MD2: 5

Q.93. Which of the following statements comes closest to your opinion about freely donated blood ? (SHOW CARD** -- ONLY ONE ANSWER)

1. Freely donated blood should be given for free to people who need it
2. A charge can be made to cover the cost of collecting, testing and distributing blood
3. A charge can be made over and above the cost of collecting, testing and distributing blood, but only in order to finance research, information and campaigns for more blood donations
4. Blood can be sold like any other product

V379 Q98 EU BLOOD DONAT PLAN - COMMON POLICY
--

Location: 556 MD1: 0
Width: 1 MD2: 3

Q.98. In your opinion, should this plan be achieved by each ((EC & UE (EC)) country separately or by all ((EC & UE (EC)) countries working together ? (SHOW CARD **)

1. Each ((EC & UE (EC)) country separately (i.e. each country should be self-sufficient in blood)
2. All ((EC & UE (EC)) countries working together (i.e. countries having too much blood should share it with those not having enough)

V530 C1 OPINION LEADERSHIP INDEX

Location: 736 MD1: 0
Width: 1 MD2: 9

NO NATIONAL QUESTIONS IN LUXEMBOURG, THE NETHERLANDS, UNITED KINGDOM

C.1. Opinion Leadership <Cognitive Mobilization Index>

<This variable combines responses to Q.4 and Q.5 to form an indicator of an individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977), Chapter 11. This variable is labeled the Opinion Leadership Index in the codebooks for Euro-Barometers 3, 4, 5 and 6.>

1. High cognitive mobilization <Coded 1 for Q.4/V38 and 1 or 2 for Q.5/V39>
2. Medium-high cognitive mobilization <Coded 1 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39; or coded 2 for Q.4/V38 and 1 or 2 for Q.5/V39>
3. Medium-low cognitive mobilization <Coded 2 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39; or coded 3, 4, or 0 for Q.4/V38 and 1 or 2 for Q.5/V39>
4. Low cognitive mobilization <Coded 3 for Q.4/V38 and 3, 4, or 5 for Q.5/V39; or coded 3, 4, 5, or 0 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39>
0. <NA> <Coded 0 in Q.4/V38 and 0 in Q.5/V39>
9. <INAP, not available for Finland; coded 16 in V7>

V531 C4 SOCIO PROF STATUS (OCCUPATION RECODE)

Location: 737 MD1: 00
Width: 2 MD2: 99

C.4. Socio Professional Status <This variable was constructed from responses to D.15A, D.15B, and D.21A.>

<Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative, also used in past EURO-BAROMETER reports, is to base analyses on a (non-Marxist) concept of "objective social class" using the occupation of the "person who contributes most to the household income" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called: "SOCIO-PROFESSIONAL STATUS". For those in paid work it is based on their own present occupation. For those not in paid work, "former occupation" was used where applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed). For those who have never been in paid work, the occupation of the "person who contributes most to the household income" was used and, if the head of household was not in work at the time of the interview, his or her "former occupation" was used, where applicable.>

SOCIO-PROFESSIONAL STATUS is, consequently, a classification "as close to the respondent himself/herself as possible" but drawing upon additional background information to the extent necessary and available, in order to determine the interviewee's socio-professional status, including a maximum of respondents in the respective analyses.>

V532 C11 MEDIA USE INDEX

Location: 739 MD1: 0
Width: 1 MD2: 9

C.11. MEDIA USE (News on TV, Radio and Papers)

<This index is based upon answers to question Q16 (V56-V58): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?" It combines the answers in the following way:

- +++ News on TV, radio and papers every day or several times a week;
- ++ Two media every day or several times a week, the third medium not more than once or twice a week;
- One of the three media every or several times a week, the two others not more than once or twice a week;
- The three media less than once or twice a week.>

1. +++ <Coded 1 or 2 for V56, V57 and V58>
2. ++ <Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable>
3. -- <Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables>
4. --- <Coded 3, 4 or 5 for V56, V57 and V58>
0. <NA> <Coded 0 or 6 for either V56 or V57 or V58>
9. <INAP, not available for Finland; coded 16 in V7>

V533 C12 EUROP SOCIAL GRADE (ESOMAR)

Location: 740 MD1: 0
Width: 1 MD2: 9

C.12. European Social Grade (ESOMAR 7-point scale)

<This scale is based on the recommendation of the European Society for Opinion and Marketing Research (ESOMAR) to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on a classification into 16 groups (E1 to E16) of the occupation of the Main Income Earner:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 Employed position, working mainly at a desk
- E9 Business proprietors, owner (full/partner) of company (5 employees or less)
- E10 Student
- E11 Employed position, not at a desk but traveling or in a service job
- E12 Farmer and fisherman
- E13 Responsible for ordinary shopping and looking after the home, housewife
- E14 Supervisor and skilled manual worker
- E15 Other (unskilled) manual worker, servant
- E16 Retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durables is based on ownership in terms of number of products owned (D.14): a colour TV set, a video recorder, a video camera, a radio-clock, a PC/home computer, a still camera, an electric drill, an electric deep fat fryer, two or more cars, and a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with the following categories (upper to lower): A B C D E1 E2 E3. For more details see standard report EUROBAROMETER 1, July 1994, Brussels,
