### Preliminary Remark

As a result of the increased number and volume of recent surveys connected with the Eurobarometer survey series, the Inter-university Consortium for Political and Social Research (ICPSR) and the Zentralarchiv für Empirische Sozialforschung (ZA) have entered into a co-operative arrangement for the production and distribution of these important data collections. The present codebook is a product of this joint endeavour. Under this agreement, ICPSR and ZA alternately assume responsibility for the production of each survey. In this way all users will receive Euro-Barometer data sets and codebooks in identical standard formats although each archive will employ its own study number to identify each survey.

Since this co-operation presupposes common standards for data and codebook preparation, the formatting may in some details diverge from the usual ICPSR or ZA standards. For example, all frequency tables in this codebook are based on unweighted data while ICPSR codebooks generally contain only weighted frequency counts.

### Bibliographic Citation

Publications based on ICPSR or ZA data collections should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

**Reif, Karlheinz and Eric Marlier**

**Eurobarometer 42: The First Year of the New European Union  
November-December 1994**

[Computer file]. Conducted by INRA (Europe), Brussels, on request of the European Commission.

ZA 2nd ed. Cologne, Germany: Zentralarchiv für Empirische Sozialforschung [producer and distributor], 1997.

Ann Arbor, MI: Inter-university Consortium for Political and Social Research [distributor], 1997.

### Request for Information on use of ICPSR/ZA Resources

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about ICPSR/ZA participants' research activities, users of ICPSR/ZA data are requested to send to ICPSR or ZA respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data were used.

### Data Disclaimer

The original collector of the data, ICPSR, ZA and the relevant funding agency bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

### The Eurobarometer (a.k.a. Euro-Barometer) Survey Series

The Eurobarometer surveys are the fruit of a unique program of cross-national and cross-temporal social science research. The effort began in early 1970, when the Commission of the European Communities began to carry out simultaneous surveys of the member nations of the European Community. Early efforts continued with two more surveys of the member nations in 1971 and 1973. In 1974, the Commission of the European Communities officially launched the biannual Eurobarometer series of surveys, conducted in the Spring and Fall of each year. These surveys are designed to provide regular monitoring of the social and political attitudes of the publics in the European Community member nations, now twelve in number. Of primary concern are public awareness of and attitudes toward the Common Market and other European Community institutions and policies. Special topics of interest, such as consumer attitudes, the environment, gender roles, energy problems, poverty or health-related issues, have also been investigated intermittently.

#### **Eurobarometers available from ICPSR/ZA:**

- European Communities Study, 1970 (ICPSR 7260 / ZA 0626)

  - Eurobarometer 37.0 + 37.1 (selected questions): European Drug Prevention Program, March-May 1992 (ICPSR 9956 / ZA 2243) (\*)
  - Eurobarometer 38.0: The European Unification, the European Court of Justice, Passive Smoking, and Consumer Issues, September-October 1992 (ICPSR 6044 / ZA 2294)
  - Eurobarometer 38.1: Consumer Protection and Perceptions of Science and Technology, November 1992 (ICPSR 6045 / ZA 2295)
  - Eurobarometer 39.0: European Community Policies and Family Life, September-October 1992 (ICPSR 6195 / ZA 2346)
  - Eurobarometer 40: Poverty and Social Exclusion, October-November 1993 (ICPSR 6360 / ZA 2459)
  - Eurobarometer 41.0: Trade Issues, Blood Donation, AIDS, and Smoking, April-May 1994 (ICPSR 6422 / ZA 2490) (\*)
  - Eurobarometer 41.1: Post-European-Election, June-July 1994 (ICPSR 6535 / ZA 2491) (\*)
- (\*) Preliminary edition without machine-readable codebook

This series of surveys was originally conducted under the direction of Jacques-Rene Rabier. Since 1987, Dr. Karlheinz Reif has directed the "Surveys, Research and Analysis" division of the Commission of the European Communities (European Commission) under the Directorate General for "Information, Communication and Culture" (DG X), together with Dr. Anna Melich and Eric Marlier.

Starting with Eurobarometer 38.0 the ICPSR and the ZA are co-operating in the cleaning and processing of the study. Identical datasets, SPSS setups and English-language codebooks will be distributed by both archives. Further information on the Eurobarometer survey series is available through the World Wide Web, via Zentralarchiv URL: <http://www.za.uni-koeln.de>.

### Study Description

This round of Eurobarometer surveys queried respondents on standard Euro-Barometer measures such as public awareness of and attitudes toward the Common Market and the European Union (EU), and also focused on the image of politics in Italy, nutrition and the risk of getting cancer, and awareness of the European Community Humanitarian Office (ECHO). EU matters covered included the powers, importance, and representativeness of the European Parliament, the protection of personal interests by the European Parliament, and the relative importance of European political policy areas in future elections. Respondents were also questioned on their awareness of outcomes in recent referenda for joining the EU. Questions on the image of politics in Italy included the respondent's awareness of politics in Italy and ratings of the political and economic situations in Italy. Regarding cancer risks, respondents rated 13 food items as increasing, decreasing, or causing no change in their risk of getting cancer. Respondents were also asked about their awareness of the ECHO logo, knowledge of ECHO's humanitarian assistance to the EU as a whole, to Rwanda, and to Yugoslavia, whether ECHO should increase its humanitarian assistance to non-EU countries, whether the EU, the United States, or Japan gives the most money for humanitarian assistance to non-EU countries, the most effective way for EU countries to give humanitarian assistance, and the level of involvement by the EU in distributing money for humanitarian aid. In France only, respondents were queried on their awareness and consumption of cola drinks. Demographic and other background information was gathered on the number of people residing in the home, region of residence, and occupation of the head of household, as well as the respondent's age, sex, marital status, education, occupation, religion, religiosity, subjective social class, and left-right political self-placement.

### Special Release: European Election Study 1994

Please notice the special release of codebook and data sets of European Election Study 1994 (ZA study numbers 2866-2869). A number of pertinent variables from Eurobarometer 42 are documented and included here. The complete study essentially consists of a survey conducted immediately after the European Parliament election of June 1994 in the framework of Eurobarometer 41.1. In addition pertinent variables from Eurobarometers 40 and 41.0 are also included. Identical questions have been asked in all member states of the European Community, some of them have been included in two, a few in three or four of the interviews. As a consequence the study offers wide opportunities for comparative and longitudinal analyses of voter behavior and voter orientations. Longitudinal analysis are particularly supported by the fact that 1994 study contents are partially overlapping with those of the European Election Study 1989 (ZA study number 2320).

The special data release EES 1994 was prepared in the framework of the 'European Elections Study Research Group' by Hermann Schmitt (Mannheimer Zentrum fuer Europaeische Sozialforschung, University of Mannheim), Franz Urban Pappi (University of Mannheim), Cees van der Eijk (University of Amsterdam) and Evi Scholz (ZEUS, University of Mannheim) in collaboration with Pilar del Castillo (UNED, Madrid), Roland Cayrol (CEVIPOF, Paris), Mark Franklin (University of Houston), Renato Mannheimer (University of Genova), Michael Marsh (Trinity College, University of Dublin), Karlheinz Reif (European Commission), and Colette Ysmal (CEVIPOF, Paris).

### Sampling and Fieldwork

From November 14 to December 31, 1994, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels. In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

In all, Eurobarometer 42 interviewed 13.063 citizens of the 12 countries in the European Community (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In addition, 1082 Austrian, 501 Swedish, 1000 Finnish, and 1031 Norwegian citizens aged 15 and over were interviewed with a subset of questions.

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes. In Sweden the interviews were carried out via telephone.

The firms responsible for carrying out each national survey are shown below, together with interviewing dates for each country. Users should contact these organizations for more detailed information regarding sampling methods.

14 November 94 to 27 November 94
- Norway:            Nielsen Norge a.s., Bergen --  
30 November 94 to 31 December 94

### Weighting Information

Ten weight variables are provided in this dataset: four Nation Weights (WEIGHT RESULT FROM TARGET, WEIGHT ADJUSTED TO STANDARD SIZE, WEIGHT SPECIAL UNITED KINGDOM, WEIGHT SPECIAL GERMANY), and six European Weights (WEIGHT EURO 6, WEIGHT EURO 10, WEIGHT EURO 12, WEIGHT EURO 12+, WEIGHT EURO 15, WEIGHT EURO 15+NORWAY).

Nation Weights incorporate post-stratification adjustments based on crosstabulations of national populations by sex, age, region, and size of locality. In some countries, cross-tabulations of a higher dimension were used, by cross-tabulating with additional variables. Data for post-stratification were provided by EUROSTAT and the survey firms in each country. WEIGHT RESULT FROM TARGET and WEIGHT ADJUSTED TO STANDARD SIZE are for use in separate analyses of individual countries.

**WEIGHT RESULT FROM TARGET** reproduces the real number of cases for each country. British and Northern Irish as well as East and West German samples are weighted separately. This weight corresponds to former NATION WEIGHT II (up to Eurobarometer 31).

**WEIGHT ADJUSTED TO STANDARD SIZE** is equivalent to WEIGHT RESULT FROM TARGET adjusting all samples to the standard size of 1000 cases (respectively 300 for Northern Ireland and 500 for Luxembourg and Sweden).

**WEIGHT SPECIAL UNITED KINGDOM** adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included and (unlike the corresponding former NATION WEIGHT I up to Eurobarometer 31) all samples are adjusted to the standard size.

**WEIGHT SPECIAL GERMANY** adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever the united Germany is to be analyzed as a whole.

**EURO WEIGHT 12+** includes an adjustment of each national sample in proportion to its share in the total population of the European Community, ages 15 and over. These post-stratification adjustments were based on population figures published by EUROSTAT in the Regional Statistics Yearbook. EURO WEIGHT 12+ is intended for use in analyses of the European Community nations as a whole. Austria, Sweden, Finland and Norway are weighted by zero. EURO WEIGHT 15 includes the future member countries Austria, Sweden and Finland; EURO WEIGHT 15+ includes the new member countries plus Norway.

EURO WEIGHT 12 is similar to EURO WEIGHT 12+, but excludes East Germany. In addition EURO WEIGHT 10 excludes Spain and Portugal. EURO WEIGHT 6 only refers to the six EC founder members (France, Belgium, Netherlands, West Germany, Italy and Luxembourg). The European weights equal zero for all excluded countries.

All European Weight Variables include the national weighting factors for each sample and - unlike the former EUROPEAN WEIGHT up to Eurobarometer 31A - also contain the adjustment to the standard sample size.

**Table: Number of Respondents and Sums of Weights**

	Number of Respondents	Sum of WEIGHT UK	Sum of WEIGHT GERMANY	Sum of EURO WEIGHT 12+
France	1.007	1.000	1.000	2.077
Belgium	1.043	1.000	1.000	398
The Netherlands	1.047	1.000	1.000	535
Germany	2.052	2.000	2.000	3.130
Germany (West)	(1.018)	(1.000)	(1.583)	(2.482)
Germany (East)	(1.034)	(1.000)	( 417)	( 648)
Italy	1.055	1.000	1.000	2.120
Luxembourg	500	500	500	18
Denmark	1.001	1.000	1.000	195
Ireland	1.002	1.000	1.000	121
United Kingdom	1.351	1.300	1.300	2.162
Great Britain	(1.045)	(1.268)	(1.000)	(2.107)
Northern Ireland	(306)	( 32)	( 300)	( 55)
Greece	1.002	1.000	1.000	356
Spain	1.006	1.000	1.000	1.338
Portugal	997	1.000	1.000	350
Norway	1.031	1.000	1.000	-
Finland	1.000	1.000	1.000	-
Sweden	501	500	500	-
Austria	1.082	1.000	1.000	-
Total	16.677	16.300	16.300	12.800

NOTE: Sums are rounded to the nearest whole number.

### Codebook Information

The following abbreviations are used to indicate countries:

France	F
Belgium	B
The Netherlands	NL
Germany	D
Germany (West)	D-W
Germany (East)	D-E
Italy	I
Luxembourg	L
Denmark	DK
Ireland	IRE
United Kingdom	UK
Great Britain	GB
Northern Ireland	NIRL
Greece	GR
Spain	E
Portugal	P
Norway	N
Finland	FIN
Sweden	S
Austria	A

The following example reproduces the information appearing in the machine-readable codebook for a typical variable; the numbers in brackets do not appear but are references to the descriptions:

V19 <SATISDEM> Q3 DEMOCRACY SATISFACTION  
 <1> <2> <3>  
 Location: 83 MD1: 0

- <1> Indicates the variable number. A serial variable number is assigned to each variable in the data collection.
- <2> Unique MNEMO-technical abbreviations are assigned to selected main trend variables in the data collection. This feature is not yet available in the present edition.
- <3> Indicates the abbreviated variable name (maximum of 40 characters) used to identify the variable for the user. These variable names are identical to corresponding SPSS variable labels. The variable label usually includes the question number assigned in the questionnaire.
- <4> Indicates the starting location and width of this variable when the data set is stored. If the variable is of a multiple-response type, the width referenced is that of a single response. In this example the variable named "Q3 DEMOCRACY SATISFACTION" is 1 column wide.
- <5> Indicates the code values of missing data. In this example, 0 (MD1) and 5 (MD2) or any code greater than 5, are missing data. Most analysis software packages require that certain types of data which the user desires to be excluded from analysis be designated as "MISSING DATA," e.g., inappropriate, unascertained, unascertainable, or ambiguous data categories. Although these codes are defined as missing data categories, this does not mean that the user should not or cannot use them in a substantive role and modify the corresponding SPSS definition if so desired.
- <6> Indicates the number (n) of decimal places defined for the respective variable.
- <7> This is the full text (question) supplied by the investigator to describe the variable. The question text and the numbers and letters that may appear at the beginning reflect the wording of the questionnaire item.
- <8> Comments in brackets are references which do not appear in the original questionnaire. They delineate explanatory text added by INRA or ZA/ICPSR. In this case the last appearance of the present question is referenced; in the case of multiple response variables the corresponding full text (question) is referenced.
- <9> Indicates the code values occurring in the data for this variable.
- <10> Indicates the textual definitions of the codes. Abbreviations commonly used in the code definitions are "DK" (Don't Know), "NA" (Not Ascertained), and "Inap." (Inappropriate).
- <11> The absolute frequencies for each country refer to the number of cases in the unweighted dataset. The relative frequencies for each country refer to the valid cases, i.e., the unweighted total number of cases reduced by the number of cases defined as missing data (M). The Sum refers to the total number of each country's cases in the unweighted dataset. Please notice that unlike other ICPSR codebooks all tables contain unweighted frequency counts.

## Data Preparation and Formatting

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was also created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset. Five variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, AGE RECODED, AGE EDUCATION RECODED and REGION II. Users should be aware that ZA's process of condensing information sometimes produces coding schemes that differ from those in earlier Eurobarometers.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

The data file for this Eurobarometer is available from ZA with a single logical record of 659 columns per respondent. The machine-readable (or hard-copy) codebook and SPSS control cards have also been prepared by ZA. These control cards contain formatting information as well as variable and value labels for all the variables in the collection and document cards for country-specific labelling.

**V1 STUDY NUMBER**

Location: 1  
Width: 4

ZA/ICPSR Study Number

<Respective study number of the involved archive.>

**V2 EDITION NUMBER**

Location: 5  
Width: 1

ZA/ICPSR Edition Number

<The number identifying the release edition of this dataset.>

1. 1st edition (early release)
2. 2nd edition

**V3 PART NUMBER**

Location: 6  
Width: 1

ZA/ICPSR Part Number

<The number identifying this part of a 1-part study.>

1. Eurobarometer 42

**V4 ID SERIAL NUMBER**

Location: 7  
Width: 5

Sequential respondent identification number assigned by ZA

<A unique serial number is assigned to each respondent.>

**V5 NATION I**

Location: 12  
Width: 2

Nation of interview I

<Twelve EC countries including separate samples for East and West Germany and with the addition of Norway>

**V11 WEIGHT SPECIAL GERMANY**

Location: 39  
Width: 7 Decimal Places: 4

Nation Weight III (WEIGHT SPECIAL GERMANY)

<This variable adjusts the East and West German samples to their respective proportions in the united Germany. All nation weights are included and all samples adjusted to the standard size.>

**V12 WEIGHT EURO 6**

Location: 46  
Width: 7 Decimal Places: 4

European Weight I (WEIGHT EURO 6)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size.>

**V13 WEIGHT EURO 10**

Location: 53  
Width: 7 Decimal Places: 4

European Weight II (WEIGHT EURO 10)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes East Germany, Spain and Portugal. This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Sweden, Finland, Austria and Norway are also to included.>

**V14 WEIGHT EURO 12**

Location: 60  
Width: 7 Decimal Places: 4

European Weight III (WEIGHT EURO 12)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany. This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Sweden, Finland, Austria and Norway are not included.>

**V15 WEIGHT EURO 12 +**

Location: 67  
Width: 7 Decimal Places: 4

European Weight IV (WEIGHT EURO 12 +)

<This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Sweden, Finland, Austria and Norway are excluded. -

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31 this weight contains the adjustment to the standard size.>

**V16 WEIGHT EURO 15**

Location: 74  
Width: 7 Decimal Places: 4

European Weight V (WEIGHT EURO 15)

<EURO WEIGHT 15 adjusts each national sample in proportion to its nation's share in the total population (aged 15 and older) of the European Union countries including the new members Sweden, Finland and Austria.>

**V17 WEIGHT EURO 15 + NORWAY**

Location: 81  
Width: 7 Decimal Places: 4

European Weight VI (WEIGHT EURO 15 +)

<EURO WEIGHT 15+ adjusts each national sample in proportion to its nation's share in the total population (aged 15 and older) of the European Union countries including the new members Sweden, Finland and Austria plus Norway.>

**V18 Q1A ELECTORAL REGISTER**

Location: 88 MD1: 5  
Width: 1 MD2: 9

Q.1 Are you ... (NATIONALITY)? (IF YES) Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General Election), under your present address, at another address or does not appear at all?

V141 Q39 EU REFERNDUM RESULT: IN AUSTRIA
--

Location: 214 MD1: 0  
Width: 1 MD2: 9

Q.39 In fact, a referendum on joining the European Union took place in four countries: in Austria, in Finland, in Sweden and in Norway.

For each of these countries, do you happen to know if there was a majority in favour of or against joining the European Union?

Q.39_1 Austria

**V163 Q42 IMPORTANCE OF GOD**

Location: 236 MD1: 00  
Width: 2 MD2: 97

Let us now turn to another topic.

Q.42 How important would you say God is in your life?  
Please choose between the two ends of scale. If God is not important at all in your life, you give a score of 1.  
If God is very important in your life, you give a score of 10.  
The scores between 1 and 10 allow you to say how close to either side you are. (SHOW CARD)

**V171 Q44A MAASTR TREATY: SINGLE CURRENCY**

Location: 245 MD1: 0  
Width: 1 MD2: 3

Q.44 What is your opinion on each of the following proposals?  
Please tell me for each proposal, whether you are for it or  
against. (EACH STATEMENT IS READ IN A DIFFERENT ORDER FOR EACH  
INTERVIEW)

Q.44a There should be a European Monetary Union with one  
single currency replacing by 1999 the (NATIONAL CURRENCY) and  
all other national currencies of the Member States of the  
European Union.

**V188 Q50 EUROP COMMISSION MANDATE ENDS**

Location: 263 MD1: 0  
Width: 1 MD2: 9

Now some questions about another institution of the European Union. Assisted by its administration of European civil servants coming from all member countries, the European Commission itself consists of the President and other Members ("Commissioners" / currently 16), one or two from each Member State.

Q.50 Do you happen to know when the European Commission, that has been in office for the last few years, will end its mandate and a new Commission will take office?

(IF YES) Will this happen currently still in 1994, or in 1995, or in 1996, or later?

1. Yes, in 1994
2. Yes, in 1995
3. Yes, in 1996
4. Yes, later
5. No / DK

**V267 Q58A EU POLICY SPEED: BELGIUM**

Location: 342 MD1: 0  
Width: 1 MD2: 3

Q.58 For some time there has been talk of a "Two Speed Europe". This means that some countries would be ready to intensify the development of a common European policy in certain important areas, while other countries would not.

Please tell me, for each of the following countries, whether or not you see it as being ready to intensify the development of a common European policy in certain important areas.  
(SHOW CARD)

**V306 Q77A RELAY ON THE EUROPEAN COMMISSION**

Location: 383 MD1: 0  
Width: 1 MD2: 3

Q.77 Many important decisions are made by the European Union. They might be in the interest of people like yourself, or they might not. To what extent do you feel you can rely or not on each of the following institutions to make sure that the decisions taken by this institution are in the interest of people like yourself?

**V338 Q80 EUROPEAN UNION: HOPEFUL/FEARFUL**

Location: 415 MD1: 0  
Width: 1 MD2: 5

Q.80 The recent past of the European Community has been marked by a number of significant developments: the "Single Market", the "Treaty of the European Union" (or "Maastricht Treaty"), the election of a new European Parliament, the formation of a new Commission, new countries to become members of the European Union, ...

Taking everything into consideration, would you say this new "European Union", as it is now called, makes you feel very hopeful, rather hopeful, rather fearful or very fearful?

<Last trend modified: EB41.0 Q.29>

1. Very hopeful
2. Rather hopeful
3. Rather fearful
4. Very fearful

**V367 Q83 FUTURE ORGANISATION OF EUROPE**

Location: 444 MD1: 0  
Width: 1 MD2: 5

Q.83 On this list are four descriptions of how Europe might be organised in the future. Please tell me which one you would prefer. (SHOW CARD - READ OUT - ONLY ONE ANSWER POSSIBLE)

1. Each country keeps its sovereignty and cares only about its own affairs
2. The countries work together sometimes, but do not give up their sovereignty and never have to submit to decisions taken by a majority of countries
3. The countries regularly work together on certain matters within common organisations, to which they transfer a part of their sovereignty; that is, they have to submit to majority decisions of these common organisations on these matters
4. The countries transfer all their sovereignty to a single common European state
5. DK
0. NA
9. Inap., not interviewed in Finland, Sweden and Austria

**V487 D15A OCCUPATION OF RESPONDENT**

Location: 584 MD1: 00  
Width: 2 MD2: 99

D.15a What is your current occupation?

<Finland does not apply the Eurobarometer standard demographic variables, but tries to recode their regular (Suomen Gallup Omnibus) demographics in the Eurobarometer context. In the case of occupation this recode does not really correspond to the Eurobarometer categories. The Finish occupation data included in this variable should only be used with caution.>

<Last trend: EB41.1 D.15a>

## NON-ACTIVE

01. Responsible for ordinary shopping and looking after the home, or without any current occupation, not working <FINLAND: other>
02. Student <FINLAND: student/in school>
03. Unemployed or temporarily not working
04. Retired or unable to work through illness <FINLAND: pensioner>

## SELF EMPLOYED

05. Farmer <FINLAND: employer in agriculture, agricultural entrepreneur>
06. Fisherman
07. Professional (lawyer, medical practitioner, accountant, architect, ...)
08. Owner of a shop, craftsmen, other self employed person <FINLAND: other employer/self employed>
09. Business proprietors, owner (full or partner) of a company

## EMPLOYED

10. Employed professional (employed doctor, lawyer, accountant, architect)
11. General management, director or top management (managing directors, director general, other director)
12. Middle management, other management (department head, junior manager, teacher, technician) <FINLAND: executive position, but not self employed>
13. Employed position, working mainly at a desk <FINLAND: lower non-manual work>
14. Employed position, not at a desk but traveling (salesmen, driver, ...)
15. Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
16. Supervisor
17. Skilled manual worker <FINLAND: manual work>
18. Other (unskilled) manual worker, servant

**C.2 VALUE ORIENTATION**

## Materialist/Post-materialist Values Index

<This index is based on question Q.3 (V34/V35): "There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority: (1) Maintaining order in the nation; (2) Giving the people more say in important government decisions; (3) Fighting rising prices; (4) Protecting Freedom of speech. Would you please say which of them you yourself consider most important in the long run? And what would be your second choice?" Respondents combining item (1) and (3) are labelled "materialist" Respondents combining items (2) and (4) are labelled "post-materialist", and others are labelled "mixed".

For a complete discussion of this variable, see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).>

1. Materialist <coded 1 for V34 and 3 for V35; or coded 3 for V34 and 1 for V35>
2. Mixed <coded 1 or 3 for V34 and 2 or 4 for v35; or coded 2 or 4 for V34 and 1 or 3 for v35> or coded 0 or 5 for either V34 or V35>
3. Post materialist <coded 2 for V34 and 4 for V35; or coded 4 for V34 and 2 for V35>

**V535 C3 EU SUPPORT TYPOLOGY - EUROP ATTITUDES**

Location: 646 MD1: 0  
Width: 1

**C.3 TYPOLOGY OF EUROPEAN ATTITUDES**

<The Typology of European attitudes is based upon answers to the following questions: "In general, are you for or against efforts being made to unify Western Europe? Are you for, very much; for, to some extent; against, to some extent; against, very much?" (Q.24 = UNIFICATION) and "Generally speaking, do you think that (your country's) membership of the European Community is: a good thing, a bad thing, or neither good nor bad?" (Q.25 = MEMBERSHIP). Positive attitudes: MEMBERSHIP "good" and UNIFICATION: "for...". Ambivalent attitudes: MEMBERSHIP "neither good nor bad" or MEMBERSHIP "good" and UNIFICATION: "against..." or MEMBERSHIP "bad" and UNIFICATION "for ..." or DK/NA. Negative attitudes: MEMBERSHIP "bad" and UNIFICATION: "against...">

1. Positive <coded 1 for V64 and either 1 or 2 for V63>
2. Ambivalent <coded 0 or 4 for V64; or coded 1 for V64 and either 3, 4, 5 or 0 for V63; or coded 2 for V64; or coded 3 for V64 and either 1, 2, 5 or 0 for V63>
3. Negative <coded 3 for V64 and either 3 or 4 for V63>
0. DK/NA <coded 0 or 4 for V64 and either 0 or 5 for V63>

**V536 C4 SOCIO PROF STATUS**

Location: 647 MD1: 00  
Width: 2 MD2: 99

**C.4 SOCIO PROFESSIONAL STATUS**

<Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. For more details see standard report EUROBAROMETER 42, December 1994, Brussels, C.5>

**V538 C11 MEDIA USE**

Location: 650 MD1: 0  
Width: 1 MD2: 9

**C.11 MEDIA USE**

<This index is based upon answers to question 0.13 (V45-V47): "About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?" It combines the answers in the following way: +++ News on TV, radio and papers every day or several times a week; ++ Two media every day or several times a week, the third medium not more than once or twice a week; -- One of the three media every day or several times a week, the two others, not more than once or twice a week; --- The three media no more than once or twice a week.>

1. +++ <Coded 1 or 2 for V45, V46 and V47>
2. ++ <Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable>
3. -- <Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables>
4. --- <Coded 3, 4 or 5 for V45, V46 and V47>
0. DK/NA <Coded 0 or 6 for either V45 or V46 or V47>
9. Inap., not available for Finland, Sweden, and Austria <coded 16-18 in V7>

**V539 C12 EUROPEAN SOCIAL GRADE**

Location: 651 MD1: 0  
Width: 1 MD2: 9

## C.12 European Social Grade (ESOMAR 7-point scale)

<This scale is based on the recommendation of the European Society for Opinion and Marketing Research to harmonise the measurement of social grade across borders. This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on 16 occupation groups E1 to E16:

- E1 General management, director or top management (6 employees or more)
- E2 Self employed professional
- E3 Employed professional
- E4 General management, director or top management (5 employees or less)
- E5 Middle management, other management (6 employees or more)
- E6 Middle management, other management (5 employees or less)
- E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)
- E8 employed position, working mainly at a desk
- E9 business proprietors, owner (full/partner) of company (5 employees or less)
- E10 student
- E11 employed position, not at a desk but travelling or in a service job
- E12 farmer and fisherman
- E13 responsible for ordinary shopping and looking after the home, housewife
- E14 supervisor and skilled manual worker
- E15 other (unskilled) manual worker, servant
- E16 retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training): 1) up to 14 years; 2) 15-16 years; 3) 17-18 years; 4) 19-20 years; 5) 21-24 years; 6) 25 years and over.

III) Household ownership of selected durable is based on ownership in terms of number of products owned (D.14): a colour TV set - a video recorder - a video camera - a radio-clock - a PC/home computer - a still camera - an electric drill - an electric deep fat fryer - two or more cars - a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with, as categories (upper to lower): A B C D E1 E2 E3. For more details see standard report EUROBAROMETER 42, December 1994, Brussels, C.9>
